EDUCATION

The Hong Kong University of Science and Technology, Hong Kong

Sep 2022 – Jun 2027 (Expected)

Year 4 in Engineering in Decision Analytics with Extended Major in Artificial Intelligence and a Minor in Mathematics

Current Major CGA: 3.626; General CGA: 3.473

St. Stephen's Girls' College, Hong Kong

Sep 2016 – May 2022

RESEARCH EXPERIENCE

Undergraduate Research Enrichments Program provided by HKUST

Feb 2024 – Jun 2024

Topic: On Identifying Web3 Business Opportunities and Challenges

EXCHANGE EXPERIENCE

Overseas Exchange: Tsinghua University, Beijing

Feb 2025 – Jun 2025

PROJECT EXPERIENCE

Final Year Project: Inventory Allocation Optimisation for Towngas

Sep 2025 – May 2026

- Developed a Rolling Horizon Mixed-Integer Programming model for inventory allocation optimisation in a team of 3, achieving 41% cost savings through simulation and building a Streamlit prototype now used by Towngas as a decision-support tool.
- Maintained close collaboration with Towngas stakeholders throughout the project to understand operational constraints and ensure the model's practical applicability to their real-world needs.

INTERNSHIP EXPERIENCE

MTR Corporation Limited: Summer Intern (in Shen Zhen Hub through HYAB Program)

Jun 2026 – Aug 2026

- Developed Fine BI dashboards for passenger injury data across Lines 4 and 13, replacing manual Excel charting with interactive visualisations, reducing staff workload and enabling deeper traceability.
- Contributed to data cleaning for MaxKB, an AI chatbot trained on incident response guidelines

The Hong Kong and China Gas Company: Industrial Trainee

Jul 2025 – Jan 2026

- Developed a PowerApps-based Non-Stock Application System with Power Automate and SharePoint, automating storage applications, cost calculations, and approval workflows and designed role-based filtering and mandatory document acknowledgement features to ensure compliance and data security for over 100 users across departments.
- Collaborated with IT to automate five of seven monthly SAP-linked reports, streamlining data consolidation across multiple warehouses.
- Built a PowerApp interface and automated monthly report dispatches for a Sharepoint-linked system, improving traceability of backend data and created a tracking platform for Dismantled Spare Parts (occurring ~twice yearly), ensuring easy traceability of rarely used items.
- Enhanced a rejected material system by reducing loading time by 10 seconds, benefiting over 50 daily users.
- Developed VBA tools to identify outstanding items with unusual placement and goods failing quality inspection, significantly reducing manual comparison time and resolved QR code printing errors through end-to-end troubleshooting, coordinating with IT and external vendors on both hardware and software issues.

DKSH: Supply Chain Management Internship

Jul 2024 – Aug 2024

- Developed a VBA tool to automate monthly data consolidation from multiple Excel files, reducing a half-day manual process to minutes.
- Authored comprehensive SOP documentation for a colleague's VBA maintenance workflow and conducted deep-dive code review while writing SOP and proactively refactored redundant logic to improve efficiency and maintainability.
- Provided ad-hoc support by troubleshooting and resolving minor VBA errors, ensuring stability of existing automation tools.

STUDENT LEADERSHIP EXPERIENCE

Peer Mentor Program under Centre for Engineering Education Innovation, School of Engineering, HKUST

Apr 2024 – Apr 2027

- Guided ~10 first-year students annually on course selection and uni life adaptation.
- Conducted monthly check-ins and answered ad-hoc questions throughout the semesters.
- Supported registration day booths and major selection helpdesk for students.
- Provided major selection peer consultation for students needing academic or personal advice.

General Secretary of The Industrial Engineering and Decision Analytics Students' Society, HKUSTSU

Apr 2024 – Apr 2025

- Organised a 3-day-2-night O Camp and various dinner gatherings throughout the year.
- Represented my major department at Info Day engaging parents and answering inquiries.

Internal Vice President of University Philharmonic Orchestra, HKUSTSU

Apr 2023 – Apr 2024

- Led logistics, communications, and backstage operations for 4 concerts, each featuring over 80 musicians and 20+ crew, reaching 1,000+ audience members cumulatively.
- Single-handedly managed over 50 auditions and organised a 20-person orientation day for new members.
- Coordinated cross-team collaboration among performers, backstage crew, and external parties to ensure seamless event execution.

COMPUTER SKILLS

- Familiar with Microsoft 365 (including SharePoint, Power Automate and Power Apps), Google suite, Qualtrics and Canva
- Advanced level in Python (Packages: familiar with NumPy, Pandas, Matplotlib, TensorFlow and more); Advance skills in C++; Intermediate level in SQL, VBA, HTML and LaTeX

LANGUAGES

- Bilingual proficiency in Mandarin and Cantonese, professional working proficiency in English (IELTS: 7.0)
